Engaged Learning

Rapidly create fully accessible engaged learning content without programming skills

Wondershare PPT2Flash Professional offers a timesaving way to create rich-media content for easy sharing and delivering online. By converting PowerPoint slides to Flash presentations, it inherits the strengths of Microsoft PowerPoint, and extends with much smaller file size, greater multimedia integration, universal accessibility and more trusted protection.

- Convert PowerPoint to Flash presentations in one click
- Template driven professional content creation
- Easily integrate with simulations and interactions
- Big time and money saving to set up eLearning

PPT2Flash Professional is an ideal choice for developing multimedia presentations that can be easily stored and delivered online.

“

PPT2Flash Professional is a breakthrough for people who want to rapidly enhance their web presentations and e-learning courses with interactivity but don't have the time, money or skills for complex programming or high-end visual design, its intuitive, easy-to-follow templates and options now allow anyone to create visual, stunning, Flash-based interactive content from PowerPoint in minutes.

-Black Jack, President of Wondershare eLearning Division

Multimedia Learning

Integrate videos, music, narration, Flash to the learning content and engage learners

Wondershare

As broadband becomes ubiquitous, interactive content designers are increasingly called upon to incorporate multiple media than doing it through a single medium (such as text).

An alternative to purely verbal presentations is to use multimedia presentations in which people learn from both words and pictures, a situation the author calls multimedia learning. Multimedia encyclopedias have become the latest addition to students' reference tools, and the world wide web is full of messages that combine words and pictures.

Wondershare PPT2Flash Professional enables users to enhance the learning content with videos, music, narrations, Flash animations with one click.

10 Benefits of Multimedia in Learning

- Alternative perspectives
- Active participation
- Accelerated learning
- Retention and application of knowledge
- Problem-solving and decision-making skills
- System understanding
- Higher-order thinking
- Autonomy and focus
- Control over pacing and sequencing of information
- Access to support information

Interactive Learning

Integrate simulations to make learning interactive and tests to track learning process

Wondershare

PPT2Flash Professional integrates simulations and quizzes to help users to rapidly create professional interactive presentations and learning content without need of any multimedia or professional expertise.

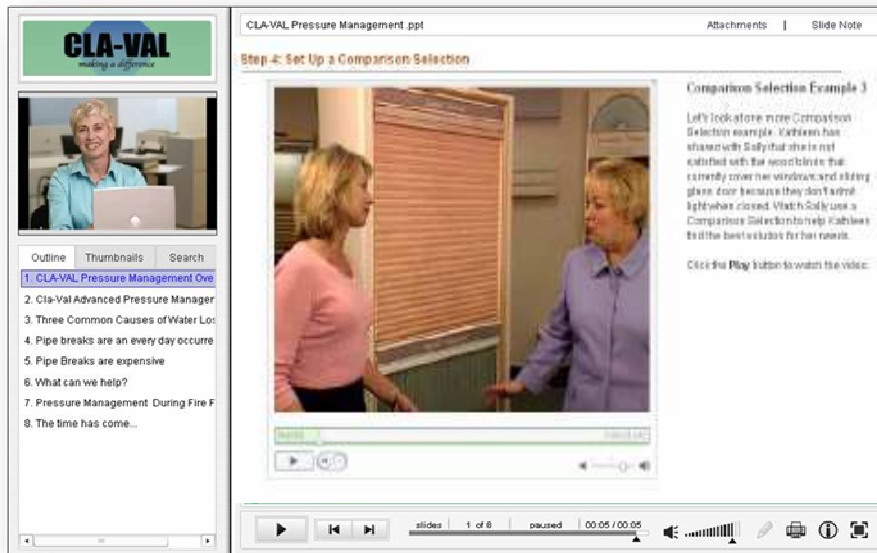

Simulation embodies the principle of "learning by doing" - to learn about the system we must first build a model of some sort and then operate the model. The Integration with simulations is ideal for the software or computer-based training and presentations.

Feedback on performance is a critical part of a learning environment and assessment is one of the most important activities in presentation and training. The survey is ideal for presentation and training courses, and the assessment could help the presenter and teacher to control the effects on the training and learning.

Player-driven Content Creation

Presenter's video and narration to make the learning live as in the real world

Wondershare

The generated Flash learning content will be organized in a flexible Flash player.

With these Flash player templates, trainers could train with their brands, videos, audio clips, photos to enhance the learning content. The Flash player template makes the online training as the way that the trainer stand along with learners.

With these Flash player templates, learners could easily select the content to learn. The player could automatically remember the content of the learner learned last time and start to play the next course when the learners login.

Wondershare PPT2Flash Professional offers a series of Flash player templates to be chosen from.

key features of Player:

- Brand
- Trainer Photo
- Trainer Video
- Trainer Profile
- Title
- Outline/Thumbnails
- Navigation
- Playback Controls
- Attachment
- Slide Note
- Search

Flexible Distribution

Distribute learning content online or to LMS (Learning Management System)

Wondershare

Wondershare PPT2Flash Professional has been OFFICIALLY tested by ADL-Lab and is listed as a SCORM Adopter. Users can use PPT2Flash Professional to create training content with AICC and SCORM1.2/2004 compliance for hosting under a third party LMS(Learning Management System) or standalone delivery on CD-ROM.

With the support of AICC and SCORM1.2/2004, users could publish the learning content to Moodle, SharePoint, BlackBoard, EKP and so on. With these LMSs, trainers could easily share their training courses online with learners. And also LMS helps trainers to manage learner's process and optimize the training courses.

System Requirements

Software/Hardware	Requirements
Microsoft PowerPoint Version	Microsoft Office PowerPoint 2000/2002/2003/2007
Operating System	Microsoft Windows 2000/XP/2003/Vista
RAM	128MB RAM(256MB Recommended)
Available Disk Space	34MB
Other Requirements	DirectX 8.1 or above
	Macromedia Flash Player 8 (Recommended especially when there is a video in PowerPoint presentations.)
	Windows-compatible display with at least 800dpi x 600dpi resolution
	Windows-compatible sound card (Recommended)

Our Company

Wondershare Software is an industry-leading learning and training software application provider. Wondershare's innovative tools for rich media content development, quiz and test authoring, simulation creation and streaming video design let end users without technical skills to create content for web publishing, online education, and business presentation.
